

Getting started with CreditPilot AI

A simple guide to setting up your workspace, managing invoices and improving cash flow.

1. Set up your workspace

Add your business name, contact details, payment instructions and reminder settings.

2. Add your customers

Create customer records with the correct contact names and email addresses.

3. Add or import invoices

Enter invoices individually or upload a CSV, then check dates and amounts.

4. Send invoices and statements

Send each invoice to the right contact or create a statement of outstanding balances.

5. Generate reminders

Create the controlled three-stage sequence: friendly reminder, second reminder and final demand.

6. Review payments and reports

Record payments and use the dashboard to understand your cash position.
